Gender Pay Gap Narrative

The SEAX Trust's **mean** pay gap falls in favour of women at **-7.6%**, explained in part by the fact that all five SEAX Headteachers and the Trust's CEO were female at the time of the snapshot date.

Whilst it is apparent that the **median** pay gap between men and women appears large at **25.95%**, this is contextualised by the demographic of the employees, in that **81%** of the Trust's workforce is female and there is a substantial skew in the lower salaried jobs, such as cleaning, catering and classroom support roles, which are historically and predominantly occupied by females.

SEAX Trust is committed to ensuring that all staff receive equal pay for equal work, regardless of gender, or any other characteristic. Teaching staff are remunerated on the national **School Teachers Pay & Conditions** document (STPCD), an incremental pay scale which rewards them for their professional performance, wider contribution to the school and their level of experience. At SEAX Trust, support staff pay follows **Local Government Pay Scales** and is regularly reviewed by Trustees and benchmarked on a national and local basis to ensure that pay correctly reflects the complexity of the work undertaken. Male and female staff at SEAX Trust are treated equally on appointment and throughout their careers with us.
